

FOR IMMEDIATE RELEASE

Cantata and XConnect Partner to Advance VoIP Peering

London, England -- June 27th, 2007 —XConnect, the world's largest provider of Federated VoIP Peering services based on ENUM, and operator of the XConnect Alliance, XConnect DirectRoute and Private Federations, and Cantata Technology™, one of the world's leading independent providers of enabling communications technology, today announced the successful interoperability and integration of Cantata's IMG 1010™ Integrated Media and Signaling VoIP Gateway with XConnect's neutral, secure suite of Federated VoIP Peering Services and the XConnect ENUM registry. Cantata Technology is now certified as an XConnect Ready™ partner.

Service providers using Cantata's award winning IMG 1010 platform can now substantially reduce their termination costs by querying the XConnect ENUM registry. The IMG 1010 can query the XConnect Registry via SIP and ENUM methodologies to identify routing details for over 300 Million telephone numbers operated by over 400 service providers.

Service providers subscribing to XConnect's peering services can now leverage the IMG 1010 to bridge between the PSTN and VoIP traffic, and enable new hosted and dedicated softswitch based applications. As a result, Cantata's clients will be able to experience the "Plug & Peer" benefits of XConnect's multilateral peering services, including higher quality of service and reduced costs for terminating VoIP calls to the millions of telephone numbers in the XConnect registry.

"Today's service providers are interested in reducing their termination costs and improving their margins by identifying wholesale traffic that is destined for VoIP networks and sending it directly to the service provider that owns the number," said Eli Katz, XConnect CEO. "We're very pleased to partner with VoIP equipment leaders like Cantata as the VoIP Peering market evolves."

"XConnect is one of the leaders in the VoIP peering space and Cantata is very pleased to become an XConnect Ready partner," said Timothy L. Murray, chief executive officer, Cantata Technology. Our recent release of ENUM support on the IMG 1010, along with XConnect's peer service, will give carrier customers reduced operating expenses, faster connection times and improved call quality."

XConnect enables feature-rich multimedia communication between VoIP service providers, and provides carriers and operators with an efficient and low-cost means to terminate calls. The XConnect Alliance, DirectRoute and Private Federations are carrier-neutral services that deliver complete interoperability, ENUM Registry Management and identity resolution in a secure environment for the interconnection of XConnect Members, including voice over broadband providers, application service providers and VoIP carriers. The Certified XConnect Ready Partner Program is designed to create an ecosystem of pre-tested vendors and solutions to facilitate peering.

About the IMG 1010

The award-winning IMG 1010 is an integrated media and signaling VoIP gateway that provides any-to-any network connectivity, enabling delivery of SIP services into legacy SS7, PRI and CAS networks, as well as IP-to-IP transcoding to connect IP networks using different protocols. The IMG 1010 offers the widest range of network interfaces in a compact, high-density 1U package, allowing service providers to deploy applications across fixed and mobile networks worldwide. More than 55 carriers in 20 countries, spanning five continents, have already deployed the IMG 1010.

Cantata recently introduced enhancements to the IMG 1010 with support for ENUM and load balancing. In total, the new release includes more than 20 additional features that enable service providers and enterprises to deploy “next generation” services on “now generation” networks. The new version of the IMG 1010 is available now.

For a complete list of the new enhancements, visit the Cantata website at http://www.cantata.com/products/img1010/1033_enhancements.cfm. For additional information about VoIP Gateways, download Cantata’s whitepaper “Paving The Way With Next Generation Media and Signaling VoIP Gateways” at http://www.cantata.com/whitepapers/pdf/paving_the_way.pdf

About XConnect Global Networks:

XConnect is the leading neutral and trusted provider of federated VoIP Peering based on ENUM; enabling service providers and carriers to dramatically reduce the costs of communication, and enable rich multimedia IP communications on a cross-network basis. Headquartered in London with offices and facilities in the USA, Europe and Asia, XConnect provides ENUM and peering services to over 400 VoIP operators in more than 35 countries, and includes numerous PTTs and Tier1 customers. XConnect services include comprehensive multi-lateral signaling and interconnection of networks, centrally managed ENUM registries with local query functionality, advanced VoIP Security, and highly flexible settlement features. Founded by its management and backed by Tier1 Venture Capital firms such as Accel Partners and Venrock Associates, XConnect, with its technology partner Kayote Networks Inc., was selected by the cable industry in the Netherlands to operate the first nation-wide VoIP peering solution, and recently acquired the European carrier ENUM exchange, e164.info and US based peering service IPeerX Inc.
