AITCheck™

Part of the RiskALERT Family

XConnect
A Somos Company

Fight fraud by protecting you and your customers from Artificially Inflated Traffic

What is AIT?

AIT occurs when bots generate one-time passcode or call-back requests. Fraudsters use premium rate and ghost numbers to incur inflated charges by triggering an A2P or call-back request, which is then sent via a high-cost route to rack up increased fees. This allows rogue mobile network operators (MNOs) or another rogue party, who receives revenue share, to profit from the increased charges.

How does AITCheck help reduce fraud?

AITCheck uses a combination of Number Range and Number Portability data in combination with real-time fraud databases to understand the threat levels of a number.

Stop attacks before they happen by quickly identifying compromised numbers and prevent Artificially Inflated Traffic from damaging your revenue and reputation. Powered by:

GSMA™

Why use it?

- Protects Aggregators, MNOs, CPaaS providers and enterprises against AIT
- Protect your revenues
- Restore trust in your SMS delivery

How do you use it?

- Validate your traffic before sending and decide whether to proceed based on the risk
- Conduct post send analysis on your traffic

GSMA IRSF database stats:

- 19m+ unique high-risk IRSF numbers in the global threat feed
- 239 countries and territories covered
- 25,000 global threats and attacks detected per day

Benefits

Fight fraud and protect your margins
Mitigate unnecessary losses by ensuring you're only routing to and from legitimate numbers.

Expert Support
Benefit from our industry leading expertise together with our award winning follow the sun implementation and support. We are committed to solving your challenges with new intelligence.

Enhanced Visibility
Gain new visibility into the traffic you carry and use it to increase profitability and gain market share.

Why Choose XConnect?

We have the largest and most trusted data sets in international telecoms and are continually refining them to ensure absolute accuracy.

We are solely focused on making it simple to use telecoms data in your operations with an **agile, collaborative and consultative** approach.

We have almost 20 years of experience in successfully using data to solve a range of carrier and operator challenges.

The industry comes to us when they need to publish changes as they know they can depend on us having the latest information on demand. We even helped the industry handle large scale routing and number range ownership adjustments such as mergers and MVNO hosting changes.
