RealNumber DNO helps mitigate fraud and support compliance

The Federal Communications Commission (FCC) is cracking down on fraudsters leveraging voice and text channels. Regulations were put into place requiring explicit effort and participation from both voice AND mobile service providers.

Protect against costly fines by complying with FCC regulations aimed at eliminating unlawful robocalls and robotexts with our DNO and DNO-T data sets.

This is the only DNO list that comes direct from the trusted administrator of the North American Numbering Plan and the TFNRegistry™.

Auto Set

Numbers that are automatically entered into the DNO database. The Toll-Free and 10-digit numbers included in this data set are procured directly from three authoritative sources: the TFNRegistry™ and the NANP combined with NPAC.

ITG Number Set

Industry Traceback Group (ITG) Number Set that have been thoroughly vetted and identified as numbers spoofed to facilitate illegal, fraudulent, or otherwise malicious traffic.

Subscriber Set

Toll-Free and local 10-digit numbers that are manually entered by Resp Orgs and Service Provider Identification Number (SPID) owners which should never be used for call or text origination.
